Vizrt Austria GmbH is located in Vomp, just outside Innsbruck in the middle of the Alps. You will find yourself working in a modern environmentally friendly building. You will work together with international people where team spirit is king and work life balance is not only a phrase. We develop core components of the Vizrt product family. To strengthen our research & development we are now looking for a

**Software Engineer Video IO (m/f)**

You complement the existing Team with your programming expertise and design, create and maintain video input/output as well as audio functionalities. You will identify bottlenecks and bugs and find smart ways to remove them. The overall responsibility is to deliver high quality solutions. Your contribution will be crucial to meet our customer requirements in the best possible manner.

**Required skills/competencies and experiences for this position:**

- Bachelor degree in computer science and software engineering and/or 2-3 years professional experience in developing software in a team
- Strong C++ programming skills
- Proficient understanding/use of code versioning tools and ticketing systems
- Familiarity with low-level hardware interaction
- Business fluency in English

**Optional skills/competencies and experiences for this position:**

- Experience in the media/broadcast industry
- Knowledge of computer audio

We offer an exciting job in an expanding international company, with good salary and employment conditions. We feature a friendly and youthful working environment with highly skilled colleagues. You will also benefit from using the most modern software development technologies and methodologies. Actual compensation is market competitive, includes a variable component and is dependent on individual professional experience and qualification.
